Where's My Doordash... [SOLUTION]

The title of this puzzle (Door**Dash** followed by three dots) implies, together with how the broken road lines in the map have different length, that this puzzles uses Morse code. Following the navigation instructions and observing the dashes in the roads gives:

— - - -   - —   — - - -   - —   — — -   - - - -   - —   — -   — — —   — — —   - — — — , which decodes to BABAGHANOOJ or Baba Ghanooj, a dish at Mediterranean Cafe.
Note that (1) intersections separate words and (2) that the direction the car, i.e. which line segments it drives over first, moves in matters.

(Easter Egg: Do these roads look familiar at all? Where might this DoorDasher be delivering to?)
